Education

Western Kentucky University

Masters of Science in Computer Science

Bowling Green, KY

Aug 2025 – May 2027(Expected)

Volunteer State Community College

Associates of Science in Computer Science

Gallatin, TN

May 2024 – May 2025

University of Tennessee at Chattanooga

Bachelor of Science in Psychology

Chattanooga, TN

Aug 2021 – Dec 2023

Relevant Coursework

- Operating Systems II
- Advanced Databases
- Data Structures
- Computer Architecture
- Security in Computing
- Object-Oriented Programming
- Artificial Intelligence
- Research Methods
- Programming in C++

Experience

Graduate Assistant

CS180: Introduction to Java

Aug 2025 – Present

Bowling Green, KY

- Delivered supplemental instruction and graded assignments for an introductory Java programming course.
- Held weekly tutoring hours to support students in debugging code, understanding OOP concepts, and improving problem-solving skills.
- Collaborated with faculty to develop learning materials and support over 60 undergraduate students.

Undergraduate Teaching Assistant

Psychology 1010: Introduction to Psychology

Jan 2023 – Dec 2023

Chattanooga, TN

- Co-led instruction and review sessions for introductory psychology courses of 300+ students.
- Led small group sessions to explain statistical and research concepts clearly.

Projects

Golf Club Recommendation App | *Python, Django, PostgreSQL*

Aug 2025

- Developed a Web application to register a users golf shots and recommend a club based on several environmental factors.
- Implemented SciKit-Learn to utilize K-Nearest Neighbor in order to accurately predict which club to use based on several weighted variables (Distance, Lie, Fade/Draw).
- Developed all front-end components and UI/UX flows for user interaction.

Ai Model Interface | *Python, Django, Scikit-Learn, Pandas*

November 2025

- Created a Web interface that utilizes linear regression, decision trees, bagging, boosting, random forests, support vector machines, and deep neural networks.
- Users can upload data to the application and evaluate the models using metrics such as accuracy, precision, recall, and ROC curves.
- Implemented robust login system that promotes software security.

LLM Interface | *Python, React, SQLite, Ollama*

Jan 2024

- Designed a custom LLM interface that allows a user to upload any file type or website as context.
- Created a custom CSS template to mimic a computer terminal style.
- Detects client-side GPU availability to determine whether to use a lighter, or more robust model for efficiency.

Technical Skills

Languages: Python, Java, C++, SQL, Bash, HTML, CSS

Frameworks & Libraries: Django, Scikit-Learn, Pandas, React, NumPy

Databases: PostgreSQL, SQLite

Tools & Technologies: Git, GitHub, Linux (Ubuntu), VS Code, Docker
